# Share your screen using a Cisco Room device

With Cisco Room devices, you can easily share content with participants during a meeting, either wirelessly or by physically connecting your laptop.

## Share your screen with a cable

1. Connect your laptop to the Cisco Room device with the HDMI or USB-C cable
2. On the Touch tablet, tap **Share in call** to start sharing your content with participants in the meeting
3. When you're finished, tap **Stop sharing** on the Touch tablet

## Share your screen wirelessly using your mobile

1. Tap on your device icon select the Cisco Room device, and then tap **Share Screen**

   **Note:** If you want to share video and audio from your mobile device, tap **Optimize for video**, and then tap **Share**
2. Tap **Share**, then tap **Start Broadcast**
3. When you're finished, tap the top left of the screen, and then tap **Stop Broadcast**, or tap **Stop** on your Webex App
