

# Communicate your way 📱❤️👏😄

Bring a little fun to your next meeting or webinar without interrupting the flow by using Webex reactions and gestures. As a presenter, you can easily check in with your audience without anyone having to come off mute.

## Express yourself with reactions

Whether you're a host or an attendee, Webex allows you to respond instantly with a variety of emoji reactions. Share your love for an idea, applaud the speaker, laugh at a joke, and more—all without saying a word. Just tap and select your emoji!

## Enable gestures

Save yourself the clicks and share your feedback with hand gestures.

First, toggle on **Recognize hand gestures** from the emoji reactions panel. Then make the gesture in front of your camera until it shows on the screen.

The app picks up gestures like thumbs up or down, clapping, heart, and more—so everyone can see your response even if your video isn't shown on the main view.

If you have a question but don't want to interrupt, raise your hand in front of your camera and the raise hand icon will appear. If you change your mind or your question is answered, click to remove the icon.

**Get started**
