EFFECTS POWDER METALLIC PIGMENT

Product Name: Effects Powder pigment

Product Class: Dry Powder, Non-Mica, Non-Metallic Pigmenting Agent

Description:
Penntek Effectects system is a non-mica, non-metallic based powdered pigment that is designed to be added to clear coatings or sealers such as E1000, PT100 or 100% solids epoxy resins to create custom and unique coloring effects for seamless flooring systems.   .

Unlike mica base or metallic pigments, Penntek Effects Systsems is not dissolvable in waterborne or solvents but rather remains as a complete solid allowing for unique and dramatic multi-dimensional effects that distort the applications finished pattern. This distortion creates three dimensional color patterns that cannot be duplicated with other coloring or staining methods.
